

Unique Programs That *Set Our School Apart*

11-Week Equestrian Program

K-5: Saddle up for smiles! In our 11-week Equestrian Program, children get to spend time with real horses—brushing, walking, and yes, even getting to ride! These are simple, supervised rides designed for fun and confidence building—not formal riding lessons. It's the perfect way for young students to safely connect with horses, learn basic care, and develop courage and gentleness in the barn.

Grades 6-12: Hands-on horsemanship like no other. Our 11-week Equestrian Program gives students the chance to interact with horses up close—grooming, leading, and even experiencing non-instructional riding. While not a formal riding class, students will enjoy safe, guided horse time that nurtures responsibility, respect for animals, and personal growth in a unique barn-based setting.

11-Week Animal Science Course

K-5: Calling all little animal lovers! In our 11-week Animal Science class, young explorers discover how to care for creatures big and small, from cuddly pets to barnyard friends. They even get a fun peek into how farmers and veterinarians work. It's a wild, hands-on science adventure that sparks curiosity and compassion.

Grades 6-12: Future vets and zoologists, this one's for you! Our 11-week Animal Science course lets middle and high school students delve into animal biology and the business of caring for animals. From learning about wildlife habitats to understanding how farms and pet clinics run, students gain real-world insights. It's a unique blend of science and entrepreneurship that gives our students an edge in experience.

11-Week Agriculture Course

K-5: Get ready to grow! In our 11-week Agriculture class, little gardeners dig into gardening basics by planting seeds, watering plants, and watching their sprouts grow. Young students learn where food comes from as they care for their mini-garden, building patience, responsibility, and a love for nature. This hands-on gardening fun is something they'll remember forever.

Grades 6-12: Soil, sun, and science come together in our Agriculture course for older students. Where the older kids get their hands dirty growing veggies and tending the school garden while learning about sustainable farming and plant science. It's more than just planting—students see how agriculture feeds communities and practice environmental stewardship. This practical, green-thumb experience is a rare opportunity that truly cultivates leadership and learning.

Unique Programs That *Set Our School Apart*

Piano Program

K-5: Little musicians hit the keys in our joyful Piano Program. Young children learn basic notes and fun songs on the piano, turning playtime into melody. With each lesson, they build confidence, improve coordination, and spark a lifelong love of music. It's a tuneful journey where every child can shine!

Grades 6-12: Our Piano Program strikes a chord with middle and high schoolers ready to make music. Whether beginners or budding virtuosos, students in grades 6-12 learn to read music, master piano techniques, and even perform their favorite pieces. This program nurtures creativity and discipline—proof that at our school, the arts thrive alongside academics, helping our students discover their talent and passion.

Spanish Course

K-5: ¡Hola! K-5 students get a lively introduction to Spanish through games, songs, and everyday words. In our fun Spanish classes, little ones learn simple phrases and explore new cultures, turning language learning into an exciting adventure. Early exposure to Spanish boosts their brainpower and broadens their horizons—one happy “¡hola!” at a time.

Grades 6-12: From “hello” to full conversations, our Spanish program immerses older students in a world language. Grades 6-12 build real communication skills—speaking, reading, and writing in Spanish—that prepare them for travel, friendships, and future careers. By becoming bilingual, our students grow as global citizens. It's a vibrant learning experience that truly sets them apart in an interconnected world.
